

## SUS-RAP®

### Corrugated protection

#### **Reduces Material Costs**

Excess consumables such as, polybags, foam, sheets, taping, are rarely needed

#### **Internationally Compliant**

Made from naturally sanitary materials exempt from ISPM-15 certification

#### **Highly Sustainable**

Made from renewable resources and recycled fiber that is 100% recyclable

#### **Fully Customizable**

Designed and engineered to fit your product's needs in a variety of sizes and markets

# SUS-RAP

## Corrugated protection

SUS-RAP is a patented product that we exclusively manufacture with a unique suspension wrapping solution and is designed to reduce damage during the transportation cycle.

Three essential functions of SUS-RAP:

- Suspends in place
- Cushions and blocks
- Protects from abrasion

### Features and benefits

#### ■ Decreases packaging costs

SUS-RAP products' innovative design provides maximum product protection, while reducing the need for ancillary packaging products like polybags or foam sheets.

#### ■ Provides protection without compromise

Made from fiberboard materials, SUS-RAP products protect surfaces from abrasions. For extremely delicate products, a protective wax coating, poly lining or soft tissue can be added to further reduce the chance surface damage.

#### ■ Streamlines packaging efforts

Unlike traditional packaging, SUS-RAP products offer protection that minimizes packaging materials and labor requirements, while streamlining the packaging process.

### SUS-RAP Products

#### ■ SUS-PAK

SUS-PAK, a unique all-in-one packaging solution, features an all-inclusive packaging system from the interior SUS-RAP protection to the outer box with built-in strapping slots and strapping system. SUS-PAK helps to decrease packing time, reduce shipping damage and can eliminate ancillary consumables like polybags, foam sheets or taping.

- Decreases packaging time and costs
- Reduces shipping damage, including corner damage and abrasion
- Provides streamlined package
- Can eliminate excess consumables

#### ■ SuperFlute

From pictures, doors, tables and case goods, SuperFlute provides superior edge protection and strap positioning for palletized loads. SuperFlute, available in three weights, can be scored, cut and shaped to meet almost any packaging need. Its ability to fold over and wrap around products makes it an excellent choice for packaging round, oval or even odd shaped items.

- Perfect for packaging oval, round or odd shaped products
- Cut-to-size to minimize waste
- Multiple variations of materials and sizes
- Excellent edge protection
